

Huntington Health creates an effective and efficient compliance program with MD Ranger

Huntington Health in Pasadena, California, a 600+ bed facility ranked nationally for quality and safety, works with thousands of physicians across many specialties. Its compliance and contracting team have invested time and resources to ensure that the FMV process is effective.

Since 2013, Huntington Health has used MD Ranger to help determine physician payment rates and document FMV. Here's how they leverage MD Ranger to ensure compliance:

- MD Ranger provides the infrastructure to ensure compliance with Stark, AKS, and other federal/state regulations
- Automated FMV reports save the Huntington Health team time and streamline internal processes
- California regional benchmarks give the contracting team the information they need to negotiate contracts with local physicians and physician groups with confidence

In addition to saving time, MD Ranger has saved Huntington Health money by reducing the number of FMV opinions it needs.

"In the ten years that we've used MD Ranger, it is not often that we have had to engage another FMV service for a specialized valuation. We used to do a lot of opinions externally, but we have systematically reduced the number of valuations we purchase from consultants. The benchmarks work for our market and for our organization."

- Terence Ou, VP of Compliance, Risk, and Internal Audit

"MD Ranger streamlines my workflow and allows my team and I to juggle and manage the hundreds of physician contracts at our organization. Before using MD Ranger, we spent too much time trying to find the right benchmark and pulling reports from another survey platform. MD Ranger is so user-friendly that new team members started using the product right away with very little training. MD Ranger makes our jobs easier."

- Juan Gallegos, Contracts Manager
